After 3/31/08, no accounts with constraints are included in the composite. Composites have always included accounts to which clients may make contributions or from which they may take withdrawals. The Composite Benchmark is currently a blend consisting of 60% S&P 500 Index and 40% Barclays Capital US Treasury Bond Index (formerly Lehman US Treasury Index) that is rebalanced monthly. This benchmark has been in effect since 1/2/2006 when the asset allocation models were adjusted to reflect changing market conditions. From 10/1/2003 to 12/31/2005, the benchmark was a blend of 45% S&P 500 Index and 55% Lehman US Treasury Index that was rebalanced monthly. The Composite is designed to meet investor needs for diversified portfolio solutions with defined risk objectives. The Conservative Growth Composite targets an investor that would typically own a portfolio represented by 60% large-cap equities and 40% high-grade bonds.

**Calculation Methodology:** The Composite includes all fee-paying, full discretionary portfolios managed by the Advisory Services Group of Wachovia Securities, LLC (later RiverFront Investment Group), in this respective style. The performance provided for the Composite is prepared using full accrual, trade-dated accounting conventions. Dividends and interest on fixed income securities are accrued as earned and interest on cash balances is recognized on a cash basis. The performance returns are asset-weighted and calculated using beginning-of-month market values plus time-weighted cash flows. Portfolios are valued monthly and are linked geometrically to produce quarterly and annual returns. Total returns including realized and unrealized gains plus income are used when calculating investment performance. Pure gross performance returns are calculated before the deduction of trading expenses or advisory fees. The fees for the composite are calculated on an account-by-account basis to produce a net-of-fee return for each account which is then weighted with all of the accounts' net returns in the

composite to arrive at the net-of-fee return for the composite. The net of fees return is the pure gross return netted down by the actual wrap fee includes custodian fees, trading expenses, management fee, reporting fees, etc. All returns and valuations are in U.S. dollars.

The dispersion measure is the asset-weighted standard deviation of accounts in the composite for the entire year. Effective 9/30/09, the dispersion numbers shown are being calculated off of the net of fee performance numbers. All the dispersion numbers were changed from gross to net to reflect updated guidance from the CFA Institute.

**Other Disclosures:** Fees do not cover the fees and expenses of underlying exchange-traded funds, closed-end funds or mutual funds in the portfolio. Any particular client's account performance may differ from the composite results due to, among other things, commissions, timing of order entry, or the manner in which the trades are executed. Additional information regarding policies for calculating and reporting returns is available upon request. Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value. A complete list and description of composites managed by RiverFront is available upon request. Performance history prior to 3/31/08 was achieved at Wachovia Securities and performance beginning 4/1/08 has been achieved at RiverFront Investment group.
